

Join with us virtually,  
for the second year in a row.  
We'd rather see you all in person.  
Just making sure you know!

# Explore with us.

Over the past several years, we've invited Hamilton students in grades 6-8 to Mohawk College to immerse them in a full day of coding activities, post-secondary pathways and careers in Information and Communications Technology (ICT). Last year, we wanted to make sure our middle school students still had access to the ICT opportunities and information that CODEfest provided in the past, so we decided to host it online. This year it looks safest to be online again, so get ready for us to take you on a self-paced, virtual coding career journey.

Every Monday during the month of July, we will explore a digital career path via creative and interactive online tools to help students (and parents) understand what each involves, and introduce how students can get started on their career goals.

Starts July 5, 2021

[Register today!](#)

Hamilton Code Clubs will also be offering FREE live, virtual summer camps following the topics presented during CODEfest. Mentors will guide students through online activities, provide personal project help, and host Q &A periods with guest speakers who work in digital careers.

For more information and to register for Hamilton Code Clubs Summer Camps, please visit:
